

# CAMC'S WEST VIRGINIA MINI-MEDICAL SCHOOL FOR THE PUBLIC

## Osteoporosis 1🍏1

Tuesday, Oct. 3

Osteoporosis is often called the "silent crippler" because bone loss can occur without symptoms as we grow older. Hear our panel of experts discuss preservation of life-long bone health and current treatments for Osteoporosis. Minimally invasive procedures for the treatment of kyphosis ("humpback") will also be presented.

5 to 6 p.m.

Registration, exhibits, blood pressure screenings, fall prevention and balance screenings and consultations with WVU School of Pharmacy. Join our dietitians at the refreshment table for healthy snacks and information about calcium in your diet.

6 to 8 p.m.- Program

Our popular question and answer session will conclude the evening.
