

Establishing an Outside Calling Region Connection Using WVNET

Some students may be eligible to receive a calling card, for use during clinical rotations when you are out of the Adelphia and WVNET local service areas. This card will be issued if Bell Atlantic is not available and there is no local number available for a connection. Please contact your program coordinator for more information.

When you receive your calling card, you will need to enter your calling card number and pin into the computer in order for your computer to complete the dialing sequence. The following instructions will guide you through this process.

Using Your AT&T Calling Card

1. Click on the **Start** Button located in the lower left hand corner of the screen. Click on **Connect To**, and then click on the **AT&T Calling Card** option from the list.

2. Replace the 14 X'es in the **Dial** text box with your **calling card number** and **pin**. To add the new number, click in the text box to the left of the first X'es (in the series of 14 X'es). Hold your left mouse button down and drag to the right across all of the X'es. The X'es will then be selected and you may now type the new number.
NOTE: The calling card number is the first 10 digits.
The pin is the last 4 digits.
3. Select **Dial** to begin your calling card session.

NOTE: Please reference **Establishing a Connection via Remote Access Using WVNET** in the **Connectivity** section of this documentation for instruction on how to connect using WVNET.
