| Why does this Gap between current and desired practice exist?                       | Appalachia has a higher rate of smoking and lung cancer, due to lack of screening and education both of providers and patients. There is a stigma around lung cancer, and many patients feel as if it is their fault. When treatment is completed for lung cancer, many patients still have unmet needs, that go unaddressed. |
| How will this activity help close the practice gap / fix the identified problem(s)? | This conference will address the prevalence of the lung cancer in West Virginia, treatments for lung cancer including radiation, chemotherapy, and surgery, the conference will also address smoking cessation and therapies as well as, survivorship issues and how to create good survivorship programs.                    |
| This activity should improve:   | <ul><li>Competence</li><li>Performance</li><li>Patient Outcomes</li></ul>   |
