

Summary Results for Testosterone (Free) for Participants <20 Years of Age

FREE TESTOSTERONE (DIRECT) IN GIRLS AGED <20 YEARS

PARTICIPANTS=5815, MEAN=0.57, STANDARD DEVIATION=0.67

1st PERCENTILE=0.10, MEDIAN=0.40, 99th PERCENTILE=2.80

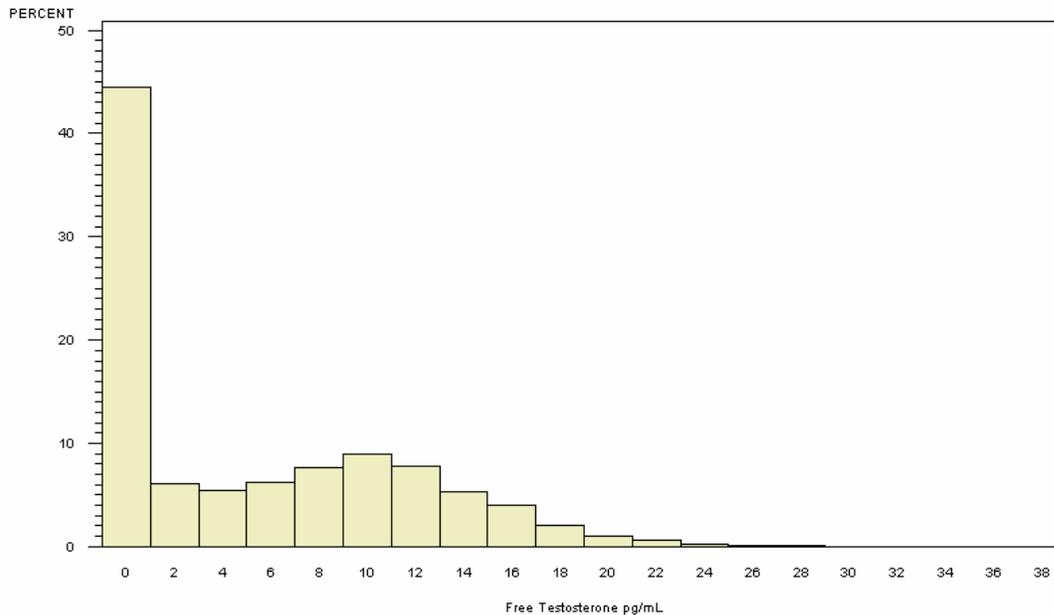

NORMAL RANGE NOT GIVEN IN <http://www.labcorp.com/datasets/labcorp/html/chapter/mono/sr010000.htm>

FREE TESTOSTERONE (DIRECT) IN BOYS AGED <20 YEARS

PARTICIPANTS=6145, MEAN=5.42, STANDARD DEVIATION=6.03

1st PERCENTILE=0.10, MEDIAN=2.70, 99th PERCENTILE=21.10

NORMAL RANGE NOT GIVEN IN <http://www.labcorp.com/datasets/labcorp/html/chapter/mono/sr010000.htm>

Reader's Guide to Understanding This Information:

Graphs of the distribution of free testosterone for boys and girls <20 years of age are shown. Due to rapid changes in levels of testosterone during growth and development, particularly puberty, no normal ranges are established for this age group.
